**Nayna Networks Chief Technology Officer, Dr. Raj Jain
Speaks At Kent State University, Kent, Ohio**

Ten Problems with the Current Internet Architecture

Santa Clara, Calif., USA – October 3, 2006 – **Nayna Networks, Inc., (OTCBB: NAYN)**, a provider of next generation network solutions headquartered in Santa Clara, California, USA, today announced that on October 6, 2006 that Dr. Raj Jain will deliver a key Internet Architecture address at Kent State University, details provided below.

In remarks prepared for his address, R. Jain discusses “Internet 3.0: Ten Problems with Current Internet Architecture and Proposed solution for the Next Generation.” In particular, the next generation of Internet has to be commerce friendly. It has to be designed to meet the needs of businesses, organizations, and governments.

The first generation Internet was designed by researchers for research. The design team did an excellent job resulting in its adoption by the masses. The next generation Internet should build on this success, keep the best ideas of the past and add features that will help businesses, organizations, and governments utilize it in the same way they utilize other methods of communication and transport and have the same or superior level of flexibility.
